

Synorix Litepaper

Version 1.0 — April 2026

Synorix is a protocol that preserves Bitcoin's core value protection principle while fairly distributing the value generated by network activity to its users.

Tokenomics

- **Total Supply:** 21,000,000 SNRX (fixed)
- **Premine:** 0% (completely fair launch)
- **Distribution:**
 - **90%** → Miners (through block rewards)
 - **10%** → Treasury (funded by network fees and a portion of mining rewards)

Treasury Allocation:

- **40%** → Liquidity (providing liquidity on exchanges and maintaining price stability)
- **30%** → Buyback & Burn (repurchasing and permanently burning SNRX)
- **30%** → Ecosystem Reward (development, marketing, community events, security audits, and operational expenses)

Vision

Bitcoin secured value.

Synorix distributes it efficiently.

Slogan

"Bitcoin secured value. Synorix distributes it."
